PROFESSIONAL SUMMARY

Junior DevOps Engineer with experience in CI/CD (Jenkins), Docker, AWS, GCP, Git, Git-Hub, ELK Stack, and Kubernetes & basic Terraform. Completed DevOps internship and cloud training with hands-on exposure to automation, deployment pipelines, and cloud infrastructure management.

TECHNICAL SKILLS

DevOps Tools: Jenkins, Docker, Kubernetes, Terraform, Git, GitHub, SonarQube, Trivy

Cloud Platforms: AWS (EC2, IAM, S3, VPC, CloudFront), GCP (Compute Engine, IAM, Cloud Storage)

Monitoring & Logging: ELK Stack, Elasticsearch, Logstash, Kibana, Filebeat, Metricbeat, Packetbeat

Core Competencies: CI/CD Pipelines, IaC, Containerization, Automation, Cloud Deployment, DevOps Lifecycle, Monitoring & Alerting

EXPERIENCE

DevOps Intern

DiraTechno | May 2025 – April 2026

- Built and maintained 2 CI/CD pipelines using Jenkins, reducing manual deployment efforts by 40% and improving release reliability.
 - Integrated SonarQube code quality checks and Trivy vulnerability scanning into pipelines, identifying and resolving 30+ security issues before production deployment.
 - Deployed 3+ production applications on AWS using CI/CD and Infrastructure as Code, reducing deployment time by 40%, improving release frequency 3x, and optimizing cloud costs by 25%.
 - Automated infrastructure provisioning using Terraform and configuration management with Ansible, reducing environment setup time by 50%.
 - Implemented centralized logging and monitoring using ELK Stack with Beats to collect and analyze 1,000+ daily log events and improving incident detection time by 60%.
 - Provisioned and managed 10+ cloud resources on AWS including EC2 instances, IAM roles, S3 buckets, and virtual networks.
-

PROJECTS

Shopease (MERN Stack + DevOps)

Role: DevOps Engineer

- Designed and deployed a containerized e-commerce application using Docker, separating 2 core services (frontend & backend) for better scalability
 - Built a CI/CD pipeline using Jenkins (Jenkinsfile) to automate build and deployment, reducing manual effort by ~25–30%
 - Orchestrated 4-container architecture (frontend, backend, MongoDB, ELK stack) using Docker Compose for consistent environments
 - Implemented centralized logging using ELK Stack, monitoring up to 500 log events/day for debugging and observability
-

CERTIFICATIONS

AWS Certified Cloud Practitioner

AWS Academy Cloud Architecting

Google Cloud Career Launchpad Cloud Engineer

Issue Date May 7, 2026

AWS Academy (2025)

Google (2025)

ACHIEVEMENTS

- Letter of Appreciation from AITR Indore for live project implementation
 - Research paper published in JETIR (May 2025)
 - Registered copyright for “Globon: Real-time Carbon Footprint Tracker”
-

EDUCATION

B.Tech — Computer Science & Information Technology

Acropolis Institute of Technology and Research, Indore

Graduation: June 2026
